How the Environment Impacts

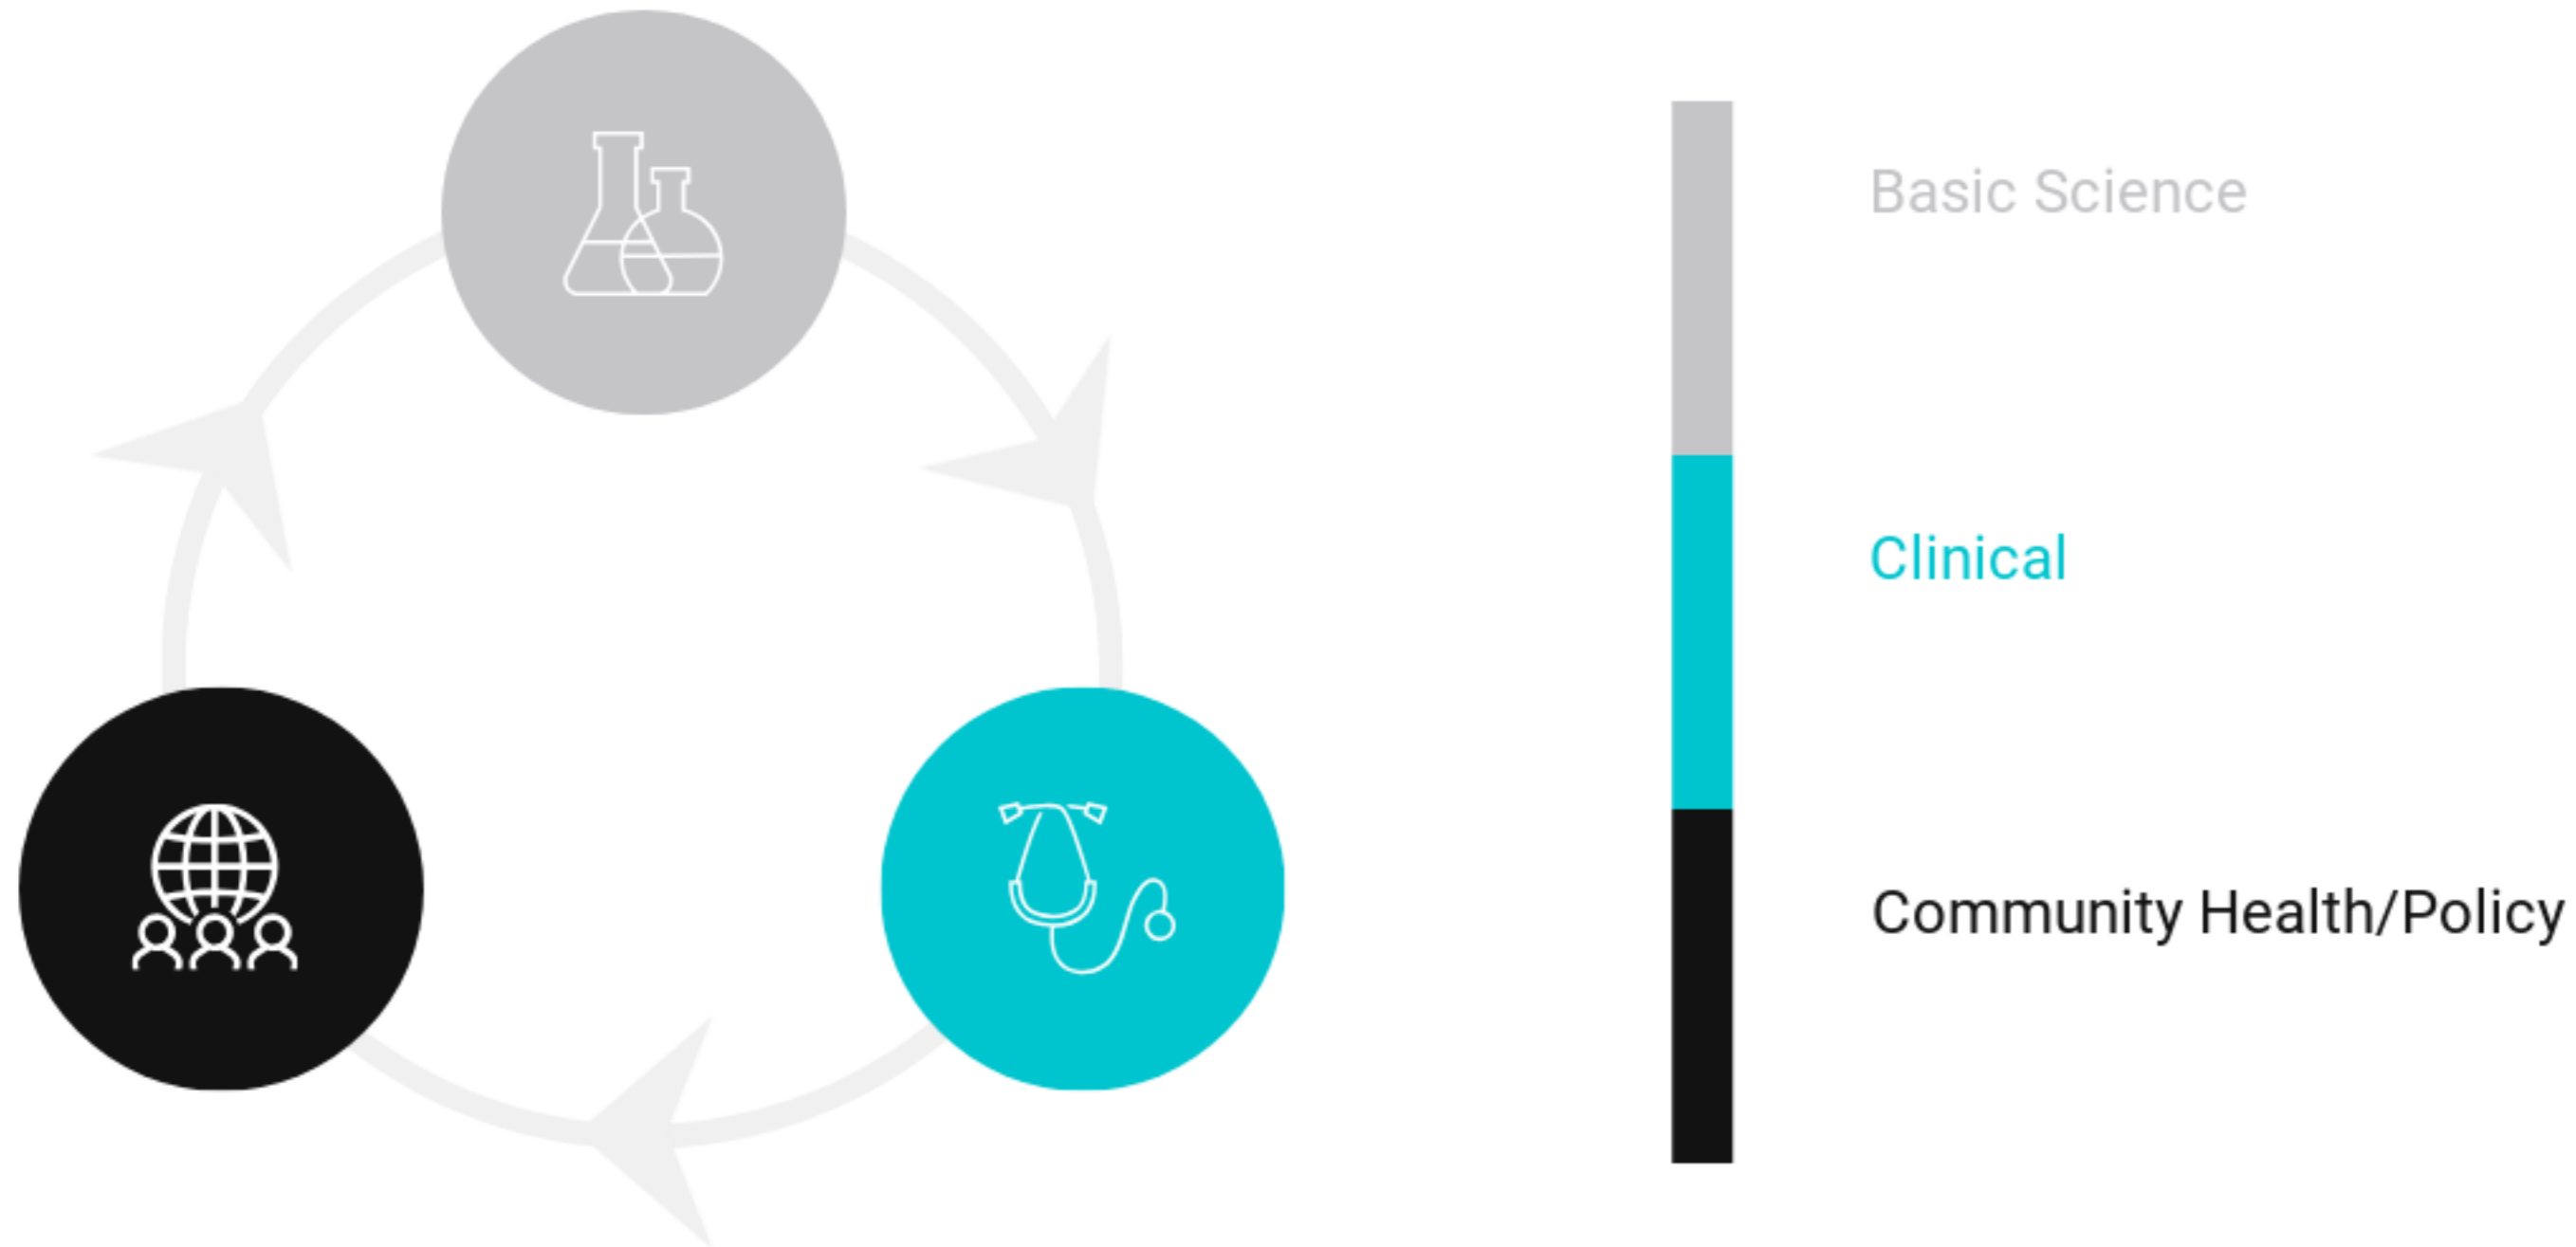

Child Health

Poster Session

Submission & Selection

3 - Research Themes - Top 3 Abstracts

Judges

Anne Sperling

Director -
Immunology, Cytometry &
Antibody Technology Core
Facility
University of Chicago

Michael Skinner

Principal Investigator -
Environmental Epigenetics
Washington State University

Jennifer Estall

Associate Research Professor -
Molecular Mechanisms of
Diabetes
McGill University

What the Judges Are Looking For

Compelling Presentation

Meaningful Innovation & Impact of Research

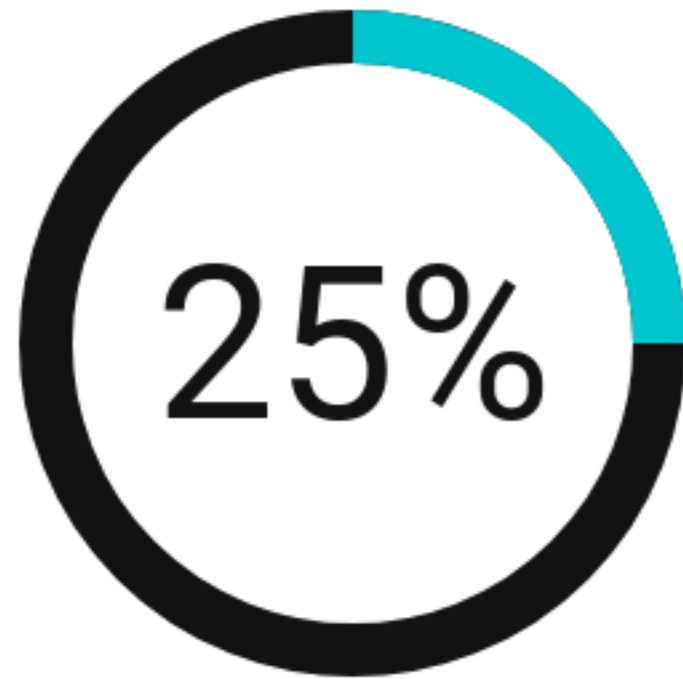

Conclusion Supported by Data

**Relevance to Child Health & Meaningful Advancement
of Knowledge in this Field**

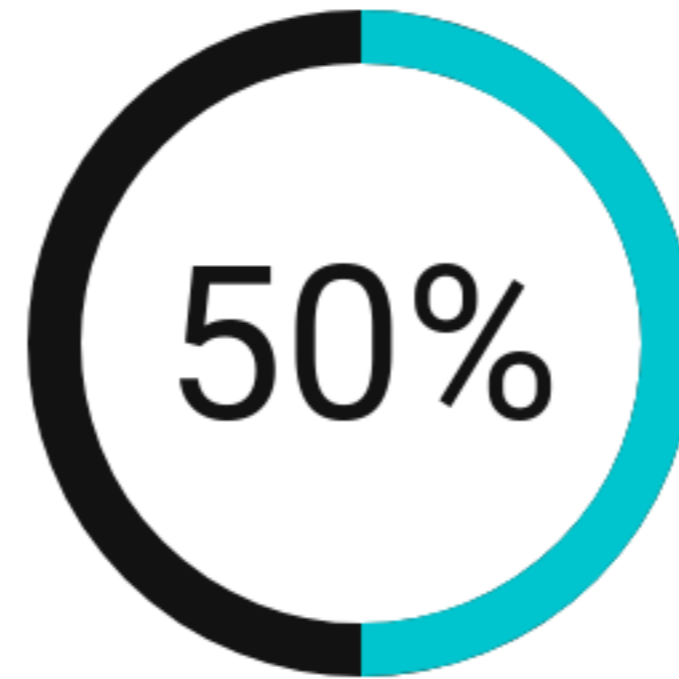

What the Judges Are Looking For

Areas of Assessment

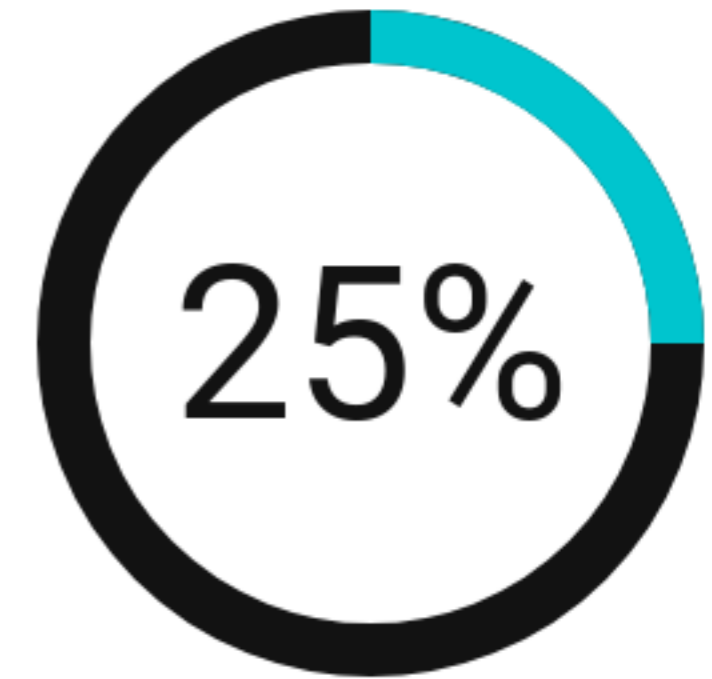

Overall Quality

Clear hypothesis and/or objectives, well set out study design and methods, linkage of results to conclusions

Research Impact

Results presenting new and widely applicable information, advancing knowledge within the field

Relevance

Research relevant to child health

Poster Session

All submitted abstracts will be presented at the poster session!

- Includes those abstracts presented during oral presentation at GoodBear's Den
- GoodBear's Den participants eligible for poster awards
